**VIGILANTE ELECTRIC COOPERATIVE, INC.
NET METERING AGREEMENT**

This agreement is entered into by _____ (Member) and **Vigilante Electric Cooperative** (Cooperative). Net Metering is defined as the interconnection of member owned generation from a renewable source to cooperative facilities, in which the generation output of energy not used at the service is netted against the energy delivered by the Cooperative within the following guidelines:

- The Cooperative will not purchase energy produced by the member.
- Nameplate generating capacity shall not exceed 10 kW.
- Member generation is intended primarily to offset part or all of the member's own electrical requirements at the service.
- Charges for energy delivered by the Cooperative in excess of the energy flowed back onto the system shall be billed monthly at a retail rate.
- If member generation exceeds the amount delivered by the Cooperative during any billing period, the excess electricity will be transferred to the next billing period.
- The net metering period will be January 1 to December 31. Any possible excess member generation will be reset to zero at the end of the net metering period.
- Monthly base charges will be assessed for Cooperative costs and expenses, including distribution and transmission costs and expenses.
- The generator will be required to sign an interconnection and operating agreement with the Cooperative.

Rates and Facilities Charges – To ensure that the Cooperative is covering its costs for the type of service described in this agreement, the Cooperative will do a cost of service study annually to determine if a rate adjustment is necessary and then implement said adjustment.

- Billing for energy delivered by the Cooperative in excess of energy flowed back onto the system will be determined by the rate class the service is in at the time of the interconnection, and is subject to the same patronage requirements for reclassification.

This agreement is effective upon the date this document is signed by authorized representatives of each entity.
